

KEY LARGO 34

AGAIN OPENING UP NEW HORIZONS

Full option boat, very real, very trendy, designed for ocean lovers and thrill seekers, with just that little touch of Italian elegance and masculinity, never ostentatious.

MILAN, 15TH JUNE 2011

Here is a KEY LARGO that will once again get itself noticed at next season's boat shows: elegance, innovation, sporting spirit... all words that are far from meaningless when you discover the concrete reality behind them. Welcome to the world of adrenalin!

FULL OPTIONS, VERY WELL EQUIPPED, TRENDY BUT NEVER OSTENTATIOUS

With the launch of this new model throughout 2010 having undergone 1300 hours design work, SESSA MARINE once again demonstrates

its capacity to design a product that more than ever marries beauty and pleasure on board: a full option product, very real, very trendy, designed for ocean lovers and thrill seekers, with just that little touch of Italian elegance and masculinity, never ostentatious.

Key Largo 34 outboard

“The KL34 is the result of in-depth market research and a project led intelligently month after month so as to remain at the forefront and incorporate everything that makes Key Largo the “absolute must” in its sector.” declares Riccardo Radice, leader of the project, “a leadership position that the Key Largo brand has secured unpretentiously over the years, driven by the will to do better.”

Via its sleek and incisive forms, the KL34 reveals an atypical character for an ambitious boat owner who does not want to go unnoticed: A boat for those who refuse to melt into the crowd and who wish to acquire a gorgeous new plaything, different from others.

Beyond aesthetics, boat owners will above all appreciate the quality of the materials and components as well as the integrated solutions provided to satisfy all their needs. Here is a Key Largo that offers an extremely complete deck layout, with for example:

✓ a wide SUN DECK at the prow equipped with an audio system, holders and storage space for the fenders;

✓ a RIGID T-TOP with an electric bimini covering the entire cockpit;

✓ a COMFORTABLE RELAXATION AND AREA - cocktail at the back with a kitchen area laid out in teak, including sink, grill, fridge and ice-maker;

✓ a SIDE LADDER that folds away into the hull;

✓ for the first time on an outboard vessel, a retracting ELECTRIC GANGWAY at the back, for easy access to the dock.

DRIVING EXPERIENCE

Powered by 2 YAMAHA V6 F300 engines for the outboard version, the KL34 sails at 40-45 knots, and can shamelessly claim high performance, flexibility and security thanks to its hull, designed to satisfy the brand's level of requirements and navigability, and tested on the water at 3 stages of its design (2 lake tests and one 2-week long distance test at sea).

To create a unique navigation experience, SESSA has once more designed a highly innovative control panel. This time, the brand goes a step further and plunges the navigator into a world of exclusivity: reminiscent of a jet or a fighter plane cockpit, the control panel is designed for quick and instinctive interpretation of information essential to instant decision-making, ideal for speed and riding the waves. Its design casts the pilot into a universe of sport and elegance.

The armrest positioned between the two seats demonstrates this, accommodating VHF, objects and beverages. With its leather upholstery this automobile-inspired element is just one of the details that gives the KL34 its strong personality.

DECISIVE DESIGN AND HIGH CLASS INTERIOR FITTINGS

With the impeccable proportions of each of its lines the design of the KL34 is a perfect combination of sporting spirit and elegance, modelled on the KL36, as well as a genuine example of optimum use of space.

In order to obtain optimal ergonomics and layout, a full-scale model of the KL34's interior was conceptualised. The model, made up of 130 m² wooden panels, confirmed the best solutions for the layout.

And for a 34 foot boat the finished result is worth the effort: 1,90m cabin height; a spacious lounge convertible into a master cabin; a kitchen area equipped with a microwave oven and a large 1000 litre fridge; behind the stairs is a second 1.50X1.85m double bed that can be separated into single beds, i.e. a total of 4 berths. Lastly, unique for this type of craft and an "extra" not available from the competition: a separate toilet and shower.

KL34 IN-BOARD, PLEASURE VERSION

With its vast, magnificent sun deck at the stern that can be made even bigger by folding away the back of the sofa, the INBOARD version is the little gem SESSA is saving for the Genoa Boat Show. It will be presented here in October, with two engine options: 2X VOLVO PENTA gasoline 5.7 V8 (640 HP) or 2X VOLVO PENTA common rail turbo diesel D3 (440 HP).

AMBITIOUS AND STATE-OF-THE-ART DESIGN

The ambition of this new open brought out by SESSA MARINE is to become the reference model in its category. To achieve this, the shipyard has pulled out all the stops in terms of studies, development and quality: 1500 computer files, 200 m² resin parts modelled with the 3D moulding machine and more than 300 different components that make up the boat.

4 exclusive full-option models of the KL34 will be navigating from port to port on the Mediterranean coast all through the summer. It will be officially presented at the Cannes Boat Show.

Le **KL 34** will be
presented
IN PREVIEW
at the Cannes Boat
Show.

Photos and videos will be available in August.

TECHNICAL SPECIFICATIONS

Overall length - 9,99 m

Beam - 3,30 m

Engine power - 700 hp / 515 Kw

Passengers - 8

Fresh water capacity- 220 l

Fuel- 1200 l

Black water capacity - 95 l

ABOUT SESSA MARINE

Established by the Radice family in 1958, Sessa Marine today offers 4 ranges of top quality open and fly yachts in 4 product lines from 18 to 68 feet. This family-run company is widely acknowledged for its innovation, and aims to design and make exclusive boats that achieve the optimal balance between design and technology, between style and quality, pursuing its mission of guaranteeing great emotions for owners of Sessa Marine boats.
