## SESSA FLY 40 – IPS 400

AT ONLY 40 FEET, IT IS THE MOST SPACIOUS FLY IN ITS CATEGORY, PACKED WITH NEW TECHNOLOGY, DESIGN, COMFORT AND TOP QUALITY FINISHINGS.

MILAN, 2<sup>nd</sup> NOV. 2011

*“Technological, supple, safe and easy to handle, this 40 foot gem has been designed for clients who navigate all year round with the family, who are looking for comfort, safety and high quality features on a limited budget,”* announces **Riccardo Radice** talking about the **FLY40**, the direct descendent of the FLY45 presented last September at the Cannes Boat Show.

### CHOOSING IPS

With 7 models already designed using IPS technology, SESSA MARINE is convinced of its now recognised qualities and again uses it for the FLY40: reduced carbon emissions, reduced consumption, 50% drop in perceived noise level, exceptional manoeuvrability and safety.

The FLY40 project has been developed around the new IPS 400 engine: powered by the 3,7 litre 4 cylinder common rail D4 engine, EVC-managed, turbo, compressor and 300 HP heat exchanger, the FLY40 will reach a maximum speed of around 30 knots and fuel consumption of approximately 80l/h at cruise speed (25/26 knots).

## SESSA FLY 40

### RECORD SPACE ON THE FLY

The FLY45 made its mark with its incredible dimensions, ergonomics and spacious feel; the FLY40 follows in its footsteps to a tee. It proudly boasts a large surface area, a **double helm seat**, a spacious front sundeck – the best place for comfort and shelter from the wind – a large **L-shaped lounge and teak table seating 8 guests**. The **kitchen unit** is identical to the unit on the FLY45.

### LUXURY GALLEY

Installed on the lower deck under a large skylight, the galley is befitting of a large size boat. It offers high quality equipment, materials and finishings in the same vein as those found on the SESSA C68: a 165 litre fridge, a MIELE brand combined electric oven, storage units, a protection system for the work surface covered in wenge lacquer...

### ROOM FOR FAMILY LIFE

Over the years SESSA has become an expert in optimising space. The FLY40 is no exception and boat owners will never feel cramped.

The highlight of the lower deck is the separate bathroom with **separate shower**, as found on the FLY45, for each of the two cabins.

Particular attention has been paid to the dimensions of the doors and cabin height as well as storage. The storage unit under the master cabin bed is larger than the one on the bigger boats of the range and is equipped with a gas piston opening device to make access really easy.

The lounge has been intelligently designed to accommodate a

**convertible double sofa bed**: in a few swift moves, the sofa is transformed into a comfortable bed without the bother of an extra mattress to store on the boat.

Additionally, a space has been created under the stairs leading to the kitchen for a 6 kg **washing machine**.

Finally, let's not forget the incredible cockpit which acts as a genuine "veranda" thanks to the innovative "stern window": a protective awning that can be raised or lowered, giving the impression of an extra "private area".

### TOP OF THE RANGE AMENITIES

Among all the amenities available on the FLY45, we can quote the ergonomically designed **wheelhouse** with double seating that can be electrically adjusted for height and depth.

## SESSA FLY 40

It is equipped with a **SONY touch-screen audio and multimedia system** for all your on-board entertainment.

Lastly, it has all the design solutions held dear by the shipyard and its designer **Christian Grande**, making every living space more comfortable and providing that special touch of cosiness: a chromatic study for experiencing space in a sensorial and unconscious manner, play on light thanks to the large windows and the presence of mirrors, the choice of materials in line with those found on the larger models of the range... Italian design at its best.

### TECHNICAL SPECIFICATIONS

Overall length – 12,20 m

Beam - 3,90 m

Engine power – 2 x IPS 400/ 500

Passengers - 12

Fresh water capacity – 360 l

Fuel - 900 l

Black water capacity – 125 l

**THE FLY40**  
**WILL BE PRESENTED AS**  
**WORLDWIDE PREVIEW**  
**AT THE**  
**FORTHCOMING**  
**BARCELONA BOAT**  
**SHOW**

**FROM 3RD TO 9TH**  
**NOVEMBER 2011**

### SESSA MARINE

Established by the Radice family in 1958, Sessa Marine today offers 4 ranges of top quality open and fly yachts from 18 to 68 feet. This family-run company is widely acknowledged for its innovation, and aims to design and make exclusive boats that achieve the optimal balance between design and technology, between style and quality, pursuing its mission of guaranteeing great emotions for owners of Sessa Marine boats.
